9. Safety and Risk Statement

9.1 Please note RRS 3 states: 'The responsibility for a boat's decision to participate in a race or to continue to race is hers alone.' By participating in this event each competitor agrees and acknowledges that sailing is a potentially dangerous activity with inherent risks. These risks include strong winds and rough seas, sudden changes in weather, failure of equipment, boat handling errors, poor seamanship by other boats, loss of balance on an unstable platform and fatigue resulting in increased risk of injury. Inherent in the sport of sailing is the risk of permanent, catastrophic injury or death by drowning, trauma, hypothermia or other causes.

9.2 All competitors shall wear personal buoyancy at all times while afloat except briefly while changing or adjusting personal clothing or buoyancy. Wetsuits and drysuits are not personal buoyancy for these purposes. This changes RRS 40 and the preamble to RRS Part 4.

Appendix 1 Safety Briefing Notes

1. This is a long distance race where weather conditions can change and boats can become isolated.
2. All competitors other than those sailing the Half Marathon are advised to carry a hand held VHF radio set to and able to communicate on channel M1.
3. The race officer will exercise a strict safety policy based on the weather forecast over the course of the race rather than on prevailing conditions. This will be based on three established forecasters, including the Met Office.
4. An early decision not to sail will be posted on the MYC/Sailracer/Sailjuice websites on Friday 5th August 2022 if the forecast for poor conditions is settled.
5. Boats should be self sufficient throughout the day with appropriate safety equipment and provisions aboard.
6. LNG Berths: These are located on the north side of the River Medway to the East of Stangate Creek. When a ship is fast alongside the established LNG berth exclusion zone and associated rules apply to all craft. When an LNG ship is transiting the River Medway or in the process of manoeuvring on/off the berth at Isle of Grain all vessels are required to keep well clear and maintain a safe distance. The chart shows the potential turning circle of an LNG ship and indicates the amount of sea room that needs to be kept clear for the turning manoeuvre. The area highlighted may alter depending on the size of the vessel and if the adjacent LNG berth is occupied by another ship, however, the zone marked is based on the largest LNG vessels expected (345m). Please see SI's as contravention may lead to disqualification. It is because of the safety significance of the LNG Berths that the orange inflatable buoy (Blackstakes Orange) is laid and used as a mark of the Marathon course requiring competing boats to pass to the south of it on the way out (leaving it to port) and on the way back (leaving it to starboard).
